Total Aggregate Portfolio

Month End Commentary - November 2022

Yields declined in November led by the 5-year note which shed 49 basis points while the 2-year declined by 17 basis points. The yield curve ended the month deeply inverted with the 2-year outyielding the 10-year by 71 basis points, the deepest inversion since 1980. Driving the decline in rates was optimism that we are turning the corner on the inflation front and nearing an end to the extreme central bank action we have endured the last several quarters. The optimistic tone carried over into risk assets with investment grade and high yield spreads narrowing and stocks, as measured by the S&P 500, rose by 5.4%.

Optimism on inflation has emerged after positive surprises in the November inflation reports for consumer and producer prices. Adding to these positive developments is a continued cooling of home prices and rents which should help ease price pressures in coming months given the lagged nature of how shelter feeds into the data. Offsetting these gains is a tight labor market leading to elevated wage pressures and buoyant services inflation ex-housing as consumers continue to pivot away from goods and towards activities that were largely shut during the pandemic. Optimism can be fleeting, so while we think the worst is behind us, we are less certain that relief will be quick and thus we maybe subject to more market volatility ahead.

The Federal Reserve, as expected, raised the federal funds rate another 75 basis points at the conclusion of their November meeting and signaled to markets their intention to step down the pace of rate hikes as soon as December where markets are anticipating another 50-basis point increase. The Fed's next meeting is set to conclude on December 14th which will include a fresh set of economic and policy rate projections where it is anticipated the median forecast will call for a peak federal funds rate somewhere around 5% in the first half of 2023. We do not expect any changes for the Fed's view on the longer-run neutral rate of approximately 2.5%.

Despite the recent decline in yields and the deep curve inversion, we advise clients to stay neutral on duration as we do not expect the Fed to remain in their overly restrictive stance for too long. The rally in corporate credit spreads leaves us neutral while we continue to find good value in the municipal and agency markets where municipals are attractive 3-years and beyond while the best value in agencies is inside the 2-year mark.

JEFF-Investment Core	39,655,786.92	2.018	(38,856.41)	(97,141.02)	(194,282.05)	(799,376.86)
Total	39,655,786.92	2.018	(38,856.41)	(97,141.02)	(194,282.05)	(799,376.86)

The changes in market values displayed represent approximations of principal changes given an instantaneous increase in interest rates. Changes in interest rates over longer periods would most likely mitigate the impact of an instantaneous change through the addition of the interest income received on the investments within the portfolio. Additional impacts to consider when estimating future principal changes also include, but are not limited to, changes in the shape of the yield curve, changes in credit spreads.

This report is for general informational purposes only and is not intended to provide specific advice or recommendations. Government Portfolio Advisors (GPA) is an investment advisor registered with the Securities and Exchange Commission and is required to maintain a written disclosure statement of our background and business experience.

Questions About an Account: GPA's monthly & quarterly reports are intended to detail the investment advisory activity managed by GPA. The custodial bank maintains the control of assets and settles all investment transactions. The custodial statement is the official record of security and cash holdings and transactions. GPA recognizes that clients may use these reports to facilitate record keeping and that the custodial bank statement and the GPA report should be reconciled, and differences documented.

Trade Date versus Settlement Date: Many custodial banks use settlement date basis and post coupons or maturities on the following business days when they occur on weekend. These items may result in the need to reconcile due to a timing difference. GPA reports are on a trade date basis in accordance with GIPS performance standards. GPA can provide all account settings to support the reason for any variance.

Bank Deposits and Pooled Investment Funds Held in Liquidity Accounts Away from the Custodial Bank are Referred to as Line Item Securities: GPA relies on the information provided by clients when reporting pool balances, bank balances and other assets that are not held at the client's custodial bank. GPA does not guarantee the accuracy of information received from third parties. Balances cannot be adjusted once submitted however corrective transactions can be entered as adjustments in the following months activity. Assets held outside the custodial bank that are reported to GPA are included in GPA's oversight compliance reporting and strategic plan.

Account Control: GPA does not have the authority to withdraw or deposit funds from or to any client's custodial account. Clients retain responsibility for the deposit and withdrawal of funds to the custodial account. Our clients retain responsibility for their internal accounting policies, implementing and enforcing internal controls and generating ledger entries or otherwise recording transactions.

Custodial Bank Interface: Our contract provides for the ability for GPA to interface into our client's custodial bank to reconcile transactions, maturities and coupon payments. The GPA client portal will be available to all clients to access this information directly at any time.

Market Price: Generally, GPA has set all securities market pricing to match custodial bank pricing. There may be certain securities that will require pricing override due to inaccurate custodial bank pricing that will otherwise distort portfolio performance returns. GPA may utilize Refinitiv pricing source for commercial paper, discount notes and supranational bonds when custodial bank pricing does not reflect current market levels. The pricing variances are obvious when market yields are distorted from the current market levels.

Amortized Cost: The original cost on the principal of the security is adjusted for the amount of the periodic reduction of any discount or premium from the purchase date until the date of the report. Discounts or premiums are amortized on a straight-line basis on all securities. This can be changed at the client's request.

Callable Securities: Securities subject to redemption in whole or in part prior to the stated final maturity at the discretion of the security's issuer are referred to as "callable". Certain call dates may not show up on the report if the call date has passed or if the security is continuously callable until maturity date. Bonds purchased at a premium will be amortized to the next call date while all other callable securities will be amortized to maturity. If the bond is amortized to the call date, amortization will be reflected to that date and once the call date passes, the bond will be fully amortized.

Duration: The duration is the effective duration. Duration on callable securities is based on the probability of the security being called given market rates and security characteristics.

Benchmark Duration: The benchmark duration is based on the duration of the stated benchmark that is assigned to each account.

Rating: Information provided for ratings is based upon a good faith inquiry of selected sources, but its accuracy and completeness cannot be guaranteed.

Coupon Payments and Maturities on Weekends: On occasion, coupon payments and maturities occur on a weekend or holiday. GPA's report settings are on the accrual basis so the coupon postings and maturities will be accounted for in the period earned. The bank may be set at a cash basis, which may result in a reconciliation variance.

Cash and Cash Equivalents: GPA has defined cash and cash equivalents to be cash, bank deposits, LGIP pools and repurchase agreements. This may vary from your custodial bank which typically defines cash and equivalents as all securities that mature under 90 days. Check with your custodial bank to understand their methodology.

Account Settings: GPA has the portfolio settings at the lot level, if a security is sold our setting will remove the lowest cost security first. First-in-first-out (FIFO) settings are available at the client's request.

Historical Numbers: Data was transferred from GPA's legacy system, however, variances may exist from the data received due to a change of settings on Clearwater. GPA is utilizing this information for historical return data with the understanding the accrual settings and pricing sources may differ slightly.

Financial Situation: In order to better serve you, GPA should be promptly notified of any material change in your investment objective or financial situation.

No Guarantee: The securities in the portfolio are not guaranteed or otherwise protected by GPA, the FDIC (except for non-negotiable certificates of deposit) or any government agency. Investment in securities involves risks, including the possible loss of the amount invested.
